

GENERAL CATALOGUE

2011/12

PLIERS ABC TECHNICAL BASICS

BASIC SHAPES OF THE JAWS

Cutting Pliers
for cutting or nipping (diagonal, centre and end cutters, carpenters' pincers etc.)

Gripping Pliers
(flat-, long-nose and water pump pliers etc.)

JOINT CONNECTIONS

Combined Pliers
for cutting and gripping (combination, stork beak and radio pliers etc.)

Special Pliers
for special applications, e.g. notching or punching different types of materials (sheet-metal nibbler, tile nibbling pincers etc.)

TYPES OF JOINTS

CUTTING CAPACITIES

The maximum values indicated always stay for the performance limit under the most favourable cutting conditions, when the wire is placed as near as possible to the joint.

CUTTING EDGES TECHNICAL BASICS

CUTTING EDGE SHAPES CONFORMING TO DIN ISO 5742

DIRECTION AND POSITION OF CUTTING EDGES

Safety instruction

Each tool should only be used for its specified purpose. When using cutting pliers: beware of wire ends flying off. Wear protective goggles and - if needed - gloves. Be aware of bystanders! Only handles marked with the symbol  1000 V are insulating.

WIRE CLASSES

	Material examples	Type of wire	Tensile strength	
			N/mm ²	kp/mm ²
	Copper, plastics	soft	220	22
	Nail, wire pin	medium-hard	750	75
	Wire rope strand, steel wire	hard	1800	180
	Spring steel wire	piano wire	2300	230

HOW EVERYTHING BEGAN – AND A SIMPLE PRINCIPLE

1882 Carl Gustav Putsch set up his own small forge shop in Cronenberg (now a part of Wuppertal).

1922 Carl Putsch takes over management. The company develops into an industrial firm.

1942 KNIPEX, the brand, is created and registered.

1954 Karl Putsch (photo left), the grandson of the company founder, takes over management of the family-owned company. Numerous innovations and modern production technology characterise the development.

1987 Ralf Putsch joins the company. International sales are seriously expanded. Other tool manufacturers become part of the KNIPEX Group.

Carl Gustav Putsch wanted to stand on his own two feet after completing his apprenticeship as blacksmith with his father. He therefore set up his own business in 1882 and forged carpenters' and farriers' pincers with two journeymen, 60 pieces per day. The other processes were also carried out in careful manual labour. The quality was sought after, the small enterprise grew.

The next generations were able to build continuously on these foundations. We have retained an independent family-owned company up to the present day. A lot has changed since the first years. Over time, the workshop turned into a factory with modern machinery and continuously improving technology. New types of pliers and pioneering innovations were added. The number of supplied countries grew steadily.

However, our fundamental principle has stayed in place: remain faithful to a product group, concentrate all strengths on it and be „simply the best“ in pliers. Don't get side-tracked, instead create more performance and quality in a single segment. This is what KNIPEX stands for as today's leading brand in pliers.

FOR WHOM WE MAKE PLIERS

They are constantly in our mind: People who work with tools professionally. Who need to be able to rely on their tools, even when the going gets tough. Who expect their tools to last a long time. In other words: Users who are demanding in every respect and who want only the best.

We offer these users a range of around 1,000 different pliers. With this choice we can provide exactly the right tool for every application - and always in a suitable design and size.

Because the verdict of the professionals is our benchmark, we are always looking for their feedback. About how they work with their pliers and what's important to them, so that we can understand precisely and in detail what matters to them.

Paramount is to know what makes their work easier, quicker and safer. That is, the subject of ergonomics, adapting working appliances to their users. Despite high performance, tools should never stress a user more than necessary. Here, for example, the good design of pliers handles is not the only criterion. We always find new ways of saving strength and relieving the whole hand-arm system.

QUALITY IN EVERY DETAIL

Sometimes we give our pliers a really hard time. We try to destroy them to find out what makes them good and long-lasting. Because we don't want to leave anything to chance, we take a long, careful look.

Many trials, for example, have shown us that high-leverage diagonal cutters for very hard wire should be alloyed at best with 0.8 % carbon and certain defined parts of chromium and vanadium.

Correctly hardened, this steel guarantees optimum cutting performance and service life. That's why we use it for our pliers – even if it has to be produced especially for us, costs more and is hard to process. But our high product demands require this.

The rivet of the high-leverage diagonal cutter also has to stand up to a lot of stress. That's why we literally give it backup: we forge it straight onto the pliers. This means extra effort – we have to precision mill the rivet to a few hundredth millimeters. Satisfied users are worth this effort.

And then there are, no less important: the angles, the sharpness, the hardness, the toughness of the cutting edges. The precision and smooth movement of the joint. The handle design and the finish: we keep reviewing these subjects, we research, test and improve.

MADE IN WUPPERTAL, GERMANY

A lot has to come together so that we can make the best pliers.

First of all, the special material. Then: modern processing methods and machines. We want to work with high precision and efficiently at all times.

The machines we require for our special needs are not always available on the market. Then we construct these ourselves. Our mechanical engineers come up with state-of-the-art solutions even for tricky tasks.

And last but not least: our employees. With their comprehensive experience, their knowledge and skills they make sure that everything turns out precisely as our customers expect. So that we can keep the KNIPEX promise.

Our pliers run through many production steps which are all carefully coordinated. From forging to machining, hardening, surface finishing and all the way to packing, these steps are all carried out under the one roof. This means that we can have a direct and complete influence on how our products are created.

The short distances allow us to respond quickly and implement improvements immediately.

When we have achieved something we are happy – but we don't stop there. For us, better is the enemy of the good. And we like to be the first to have the good ideas for better pliers.

We continuously work on new products and product advantages which offer our users tangible added value. For example by saving handforce when cutting or they can adjust pliers for gripping quicker and with more precision. Or they can do without a heavy tool because a more compact one can do the same job.

No matter whether it's a small improvement or a totally new idea: everything is meticulously thought out and designed with state-of-the-art software. New models are then put through the acid test – with the help of computer simulations in the test lab and in user testing. The results are then used to further optimise the product, it is re-tested and finally released for production.

By the time they're on the market our pliers have already come a long, hard way.

OUR CUSTOMERS

Reliably, confidently and long-term – this is how we wish to collaborate with our customers. We have been doing precisely this for decades with many of them. We offer high quality, performance, good service and contact partners who know what it's all about. We want working with us to be easy and pleasant.

Our brand is known and appreciated by consumers. We offer various support for the sale of our products. We visit users together with our distributors to present our tools. We train our partners' field salesforce because a lot can be said about our pliers which the salesperson can use as convincing arguments.

Our understanding of partnership also means that we do not sell directly to end users. And there are no exceptions.

Today, customers in more than 100 countries bank on our products. We reach them via a constantly enlarging, worldwide network of agencies, our own subsidiaries and importers. By observing the many markets we can gain insights and discover important trends, which will be beneficial to the up-to-dateness and competence of our range. Our customers also benefit from this.

OUR VALUES – OUR EMPLOYEES

We want to be successful and do a lot to achieve this. But we don't want economic success at any price and not at the expense of values which are important to us.

Our aspirations are to act and operate sustainably. The longevity of our products is only one aspect of many.

We feel closely linked with our location. That is why we are particularly aware that we have a responsibility towards our environment and society – and thereby our future generations. We want to treat resources carefully and not burden nature more than absolutely necessary.

We engage ourselves in many ways in our sphere, in particular in the sectors of education, social policy and culture.

Our employees are particularly important to us. They provide the basis for our success with their knowledge and skills, their commitment and ideas. We train them very thoroughly and support them when they want to develop themselves and learn something new. We put emphasis on a good and fair cooperation and know that we can only attain our high targets jointly.

SPECIAL TOOLS FOR PHOTOVOLTAICS

ALL WORK STEPS WELL CO-ORDINATED FOR BEST RESULTS

97 91 01

There is a steadily increase of electrical power produced by photovoltaic plants (PV systems). The output from this environmentally friendly source of energy rises each year by about 20 % worldwide. However, the share in the total power generation is still below 0.3 % worldwide, which means there is still rich potential for growth. This makes photovoltaic a profitable sphere of activities for trade and for electrical contractors.

The photovoltaic tools from KNIPEX, customized for cutting, stripping and crimping the special photovoltaic cables and connectors, offer professional and reliable work results and ensure that the relevant requirements, such as e.g. Ral GZ 966, are met.

The requirements for a technically perfect installation of the photovoltaic systems are very high. It is a demanding task to create an electrically efficient and constantly reliable connection in combination with high mechanical requirements.

 solar cable connectors

SPECIAL PHOTOVOLTAIC RANGE FROM KNIPEX

Cut effected with a Cable Shears: easy, clean cut without any deformation of the cable.

High demands in terms of results require the use of high-quality special tools also. These must be adapted precisely to suit systems from various manufacturers.

As the systems are not compatible with each other, each type of connector requires a set of individual crimping dies. The range is completed by locators to support quick, easy and precise work.

Lineman's Pliers

American style

DIN ISO 5746 ASME B107.20

09 01 240

- solid construction for heaviest strain; universally applicable
- high transmission ratio for easy cutting
- requires 40 % less effort compared with conventional combination pliers thanks to optimised transmission ratio
- ergonomically optimised handle shape for firm contact to the hand and fatigue reducing operation
- particularly effective cross-hatched knurled gripping zone in the jaws – for strong gripping and pulling
- additional gripping zone below the joint for powerful leverage and pressing performance
- with cutting edges for soft and hard wire
- cutting edges additionally induction hardened, cutting edge hardness approx. 64 HRC
- Vanadium electric steel; forged, oil-hardened

09 11 240 / 09 12 250

with fish tape puller in the joint gap; with universal mandrel crimping point below the joint

09 02 240

09 11 240

Cross-hatched, knurled gripping zone for firm gripping and pulling, e.g. for fence construction

Gripping zone below the joint for powerful leverage

Long cutting edges for cutting flat cables

09 11/12 240: fish tape puller in the joint gap

09 11/12 240: universal mandrel crimping area below the joint

Precisely and reliably

Two pairs of blades (1) cut the insulation to a complete extent. Then the blade pairs move apart, and thus the insulation is removed form-fit (2). The pliers open automatically after the stripping procedure.

- form-fit stripping also of difficult-to-remove insulating materials such as Teflon®, silicone, Radox®, Kapton® and rubber; multi-layer too
- a second pair of blades holds the remaining insulation reliably in place
- blades are shaped precisely to the respective conductor cross-section
- with an adjustable length stop when cutting the same stripping lengths during repetitive work
- Pliers body: steel
- Blade: special tool steel, oil-hardened

12 12 02

with additional cable guide for exact positioning of the cable in the stripping area of the blade

12 12 11 /

12 12 12 for solar cables

specially adapted to multi-layered and Radox® insulation; with additional cable support for a better centring of multi-layer insulated conductors in the stripping profiles

12 12 02

Principle of operation with adapted blades

Properly and precise stripping with an annular cut through the complete insulation. This is particularly important with conductors, which must be stripped precisely.

This works without any problem even with difficult materials such as Teflon®, Radox® and multilayer insulations.

12 12 02 with cable guide and length stop

Precise cutting of the insulation to a complete extent

Positive stripping thanks to precise shape of the blades

Automatic stripping of the insulation

12
40/50

Self-Adjusting Insulation Strippers

- for single, multiple and fine stranded conductors with plastic or rubber insulation
- adapts automatically to the respective cable cross-section; prevents damage to the conductor
- cutting depth can be adjusted for different insulation materials
- with wire cutter for copper and aluminium wires, multiple stranded up to 10.0 mm² and single stranded up to 6.0 mm²
- smoothly operating mechanism
- stripping blades and clamping jaws easily replaceable
- low weight
- Body: plastic, fibreglass-reinforced
- Blade: special tool steel, oil-hardened

12 40 200

for thin ribbon cables up to 10.0 mm width in a single pass

Wire cutter for multiple stranded wire cables up to 10.00 mm²

Adjustable length stop

Precise stripping prevents damage to the conductor

KNIPEX MultiStrip 10

Automatic Insulation Stripper

PATENTED

12 42 195

Mode of operation of straight cutters

Models 12 40 200 and 12 42 195

An incision is made in the red area only.

Not suitable for highly-flexible or armoured insulation materials or for multi-layered insulation.

Patented mechanics

The incision depth of the stripping blade adjusts fully automatically to the diameter of the wire and accordingly also to the thickness of all standard insulating materials. There is no need for any manual adjustment which is still necessary when other conventional pliers with a wide wire-stripping range are used.

Stripping without re-adjustment from 0.03 to 10.0 mm²

- fully automatic adjustment to commercially used single-, multi- and fine-stranded conductors with standard insulation throughout the entire capacity range from 0.03 to 10.0 mm²
- no manual fine adjustment required, no damage to the conductors
- the clamping jaws made of steel with integrated cutting edge hold the cable in a way that prevents slipping without damaging the remaining insulation
- with wire cutter for copper and aluminium conductors, multi-stranded up to 10.0 mm² and single-stranded up to 6.0 mm²
- particularly smooth-running mechanics and very low weight
- replaceable blades block and length stop
- handle with soft-plastic zone for a steady grip
- Body: plastic, fibreglass-reinforced
- Blade: special tool steel, oil-hardened

Wire cutter for multiple stranded wire cables up to 10.0 mm²

Steel restrain jaws with cutting edges avoid skidding of the cable

Precise stripping from 0.03 to 10.0 mm² without re-adjustment

Automatic Insulation Stripper

12 62 180
MM

Wire cutter up to 2.5 mm²

- compact standard tool at a favourable price for all current cable cross-sections and insulating materials
- for single, multiple and fine stranded cables of 0.2 up to 6.0 mm² with standard insulation
- adapts automatically to the respective cable cross-section; prevents damage to the conductor
- high operation comfort thanks to handy shape and low weight
- narrow head style for use in confined areas
- with wire cutter for copper and aluminium wires up to 2.5 mm²
- with adjustable length stop from 6.0 - 18.0 mm for cutting the same stripping lengths during repetitive work
- Body: plastic, fibreglass-reinforced
- Blades: special tool steel, oil-hardened, interchangeable

Precise stripping from 0.2 up to 6.0 mm²

Precision Electronics Gripping Pliers

DIN ISO 9655

34 12 130

34 22 130

34 32 130

The subtle difference

KNIPEX precision electronics pliers are made of high-quality ball bearing steel and processed with the highest degree of care. Each opening movement is gentle and even without backlash. Each work step proceeds reliably and precisely. This makes work much easier for professionals.

- for very precise assembly work, e.g. in electronics and fine mechanics
- for gripping, holding and bending
- smoothly ground gripping surfaces, edges finely rounded
- approx. 20 % lighter than conventional electronics pliers
- bolted joint and carefully manufactured joint surfaces for even, low-friction movement throughout the entire opening range
- smooth-running double spring for a gentle and even opening
- ergonomically optimised multi-component handles
- forged from chrome vanadium ball-bearing steel

Style 1

flat, wide jaws

Style 2

half-round jaws

Style 3

round, pointed jaws

Precision Electronics Gripping Pliers ESD

DIN ISO 9655

34 12 130 ESD

34 22 130 ESD

34 32 130 ESD

ESD pliers (electrostatic discharge)

- electrostatic energy is discharged through the handles in a gradual and controlled manner
- which protects components endangered by electrostatic discharge
- in accordance with applicable standards, e.g. IEC TR 61 340-5, DIN EN 61 340-5, SP Method 2472

- for very precise assembly work, e.g. in electronics and fine mechanics
- for gripping, holding and bending
- electrically discharging handles – dissipative
- smoothly ground gripping surfaces, edges finely rounded
- approx. 20 % lighter than conventional electronics pliers
- bolted joint and carefully manufactured joint surfaces for even, low-friction movement throughout the entire opening range
- smooth-running double spring for a gentle and even opening
- ergonomically optimised multi-component handles
- forged from chrome vanadium ball-bearing steel

48 21 J21
  90° 

Style 1

DIN 5256 C, straight tips

Style 2

DIN 5256 D; 90° angled tips

Pliers Sets,
see page 193

Slim head shape

Tiptop quality

Easy and reliable assembly: form-fitting inserted and pressed-in tips made of high-density spring steel offer a high level added resilience against excessive stress and strain, e.g. when removing stuck rings. The large supporting surfaces and the position of the tips make it more difficult for the rings to bounce off.

With inserted tips for reliable work

- heavy duty in continuous operation: up to 10 times longer service life compared to turned tips
- joint with screw: precise, zero backlash operation of pliers
- non-slip plastic coating on the handles
- Pliers body: chrome vanadium electric steel, forged, oil-hardened
- Inserted tips: spring steel wire, drawn

Precision and durability

High-density spring steel with a score-free surface is used for the tips. This increases the tips' resistance to dynamic and static strain. The tips are 30 % more stable than conventional pliers when subjected to one-off overloading while still allowing good accessibility during assembly. Subjected to dynamic strain, the tips' resistance capacity is up to 10 times greater!

The tips on the precision circlip pliers are non-detachable!

Sturdy, inserted tips: made from high-density spring steel

Tight fit through compression

Precision Circlip Pliers

to assemble external circlips on shafts

49 11 A2
  

Style 1
 DIN 5254 A, straight tips

49 21 A21
  

Style 2
 DIN 5254 B; 90° angled tips

With inserted tips for reliable work

- heavy duty in continuous operation: up to 10 times longer service life compared to turned tips
- large contact faces on the tips: no distortion of circlips, easy fitting
- joint with screw: precise, zero backlash operation of pliers
- internal opening spring, protected and captive
- non-slip plastic coating on the handles
- Pliers body: chrome vanadium electric steel, forged, oil-hardened
- Inserted tips: spring steel wire, drawn

49 31 A0 / Style 3

with additional opening limiter (infinitely adjustable opening width); avoids overstretching of small external circlips; DIN 5254 A; straight tips

Spring inside the joint: the spring is protected inside the precisely bolted joint. It does not hinder work and cannot get dirty or lost.

49 41 A01 / Style 4

with additional opening limiter (infinitely adjustable opening width); avoids overstretching of small external circlips; DIN 5254 B; 90° angled tips

Style 3 / style 4: with adjustable opening restriction

Pliers Sets,
 see page 193

Bolted joint: high precision and smooth action

KNIPLEX Precision Circlip Pliers: fit circlips without distortion; easy and quick assembling

Circlips are held reliably: large contact areas and the position of the tips make it difficult for the circlip to bounce off

Conventional Circlip Pliers: distortion of the circlip when widening the circlip

High Leverage Concretors' Nippers

high lever transmission

DIN ISO 9242

25 % less effort required
compared to conventional concretors' nippers of
the same size.

- to lace concrete reinforcing steel with binding wire from a roll
- wire is twisted and cut in a single pass
- high-leverage joint, minimising strain, even when thick binding wires are used
- extra-slim form for tying deep mounted steel rods
- the high damping of the cutting stroke on cutting through the binding wire reduces the strain on tendons and muscles
- cutting edges additionally hardened; cutting edge hardness approx. 61 HRC
- High-grade special tool steel, forged, oil-hardened

Bolt End Cutting Nippers

high lever transmission

DIN ISO 5743

powerful, compact, comfortable

61 01 200

85°

61 02 200

85°

- compared to conventional lever-assisted end cutting nippers, greater cutting capacity, less effort required and better handling
- for all classes of wire including piano wire
- exceptional cutting capacity due to high-leverage joint
- cutting edges additionally induction hardened; cutting edge hardness approx. 64 HRC
- Vanadium electric steel; forged, oil-hardened

Extraordinary cutting performance: also for piano wire

Almost flush cutting of bolts, nails etc.

Particularly efficient for fence construction

61 02 200

with slim two-colour multi-component sleeves without collar for better handling and easier transport; with large contact surface on the handles for better allotment of pressure and more comfort at work

KNIPEX CoBolt® Compact Bolt Cutters

DIN ISO 5743

60 % less effort required compared to conventional high-leverage diagonal cutters

The ingenious lever-action mechanism ensures an extremely favourable lever ratio with very little friction. The cutting force is about 20 times higher than the hand force applied.

71 01 200

71 02 200

71 12 200

71 22 200

∠20°

71 41 200

∠20°

Clever muscle man

- precision cutting edges for soft and hard wire and piano wire
- cuts components like bolts, nails, rivets, etc. up to 5.2 mm dia.
- exceptional cutting performance with minimum effort because of unsurpassed effective lever action design
- cutting edges additionally induction hardened, cutting edge hardness approx. 64 HRC
- Chrome vanadium heavy-duty steel, forged, oil-hardened

71 02 200

with slim two-colour multi-component sleeves without collar for better handling and easier transport; with large contact surface on the handles for better allotment of pressure and more comfort at work

71 12 200 / 71 22 200 / 71 32 200

opening spring and locking device are integrated in the handles also for comfortable work and protected transport

Style 2

20° angled head with single-sided joint bar and diagonal cutting edge for flush cutting; with space for gripping

Style 3

the recess in the blade allows easier cutting of thicker wires, e.g. for anchor bolts in false ceilings

Style 4

the recess in the blade allows easier cutting of thicker wires, e.g. for anchor bolts in false ceilings; 20° angled head with single-sided joint bar and diagonal cutting edge for flush cutting; with space for gripping

Opening spring and transport lock

Comparison between 71 0x 200 and 71 2x 200

Conventional toggle lever assisted side cutter:

max. opening approx. 3.5 mm
great weight = 600 g
double toggle lever joint
cumbersome

New KNIPEX-Model e.g. 71 31 200 CoBolt®:

weight only 330 g
good handling
small size
30 % less effort required

● hard wire Ø 2 mm

picture not true to scale

71 31/32/41 200: The cutting edge recess near the joint holds thicker wires in a favourable cutting position (optimum lever ratio). The re-positioning that is usual with bolt cutters is not needed here.

Bolt Cutters

cuts hard components up to 48 HRC

71 72 460

71 72 610

71 72 760

71 72 910

- cutting capacity up to 48 HRC hardness
- robust cutting edges are additionally induction hardened, cutting-edge hardness approx. 62 HRC
- forged-in stopper with comfortable shock-absorber
- good access due to very flat construction of head and joint area
- ergonomically angled handles to minimise effort
- sturdy non-slip two-colour dual component handle sleeves
- precise adjustment (12 positions) by eccentric bolt
- high cutting performance with minimum effort due to optimum co-ordination of the cutting edge angle, transmission ratio and ergonomic handle shape
- bolted cutter head, replaceable
- Blade: chrome vanadium heavy-duty steel, forged, oil-hardened
- Joint: special tool steel, forged
- Handle: steel tube, powder-coated

Forged-in stopper with damping inserts:
cushions the cutting stroke comfortably

cutting edges additionally induction hardened, cutting edge hardness approx. 60 HRC; with narrow head; with lead catcher – no uncontrolled loss of cut wire ends; special tool steel, burnished

78 61 125

cutting edges additionally induction hardened, cutting edge hardness approx. 64 HRC; also suitable for cutting glass fibre cables (fibre optics)

78 71 125

special tool steel, burnished; with lead catcher – no uncontrolled loss of cut wire ends; cutting edges additionally induction hardened, cutting edge hardness approx. 64 HRC

78 81 125

precision ground cutting edges with very small bevel suitable **also for hard wire**; special tool steel, burnished; cutting-edge hardness approx. 64 HRC

78 91 125

precision ground cutting edges with very small bevel suitable **also for hard wire**; with lead catcher – no uncontrolled loss of cut wire ends; special tool steel, burnished; cutting edges additionally induction hardened, cutting edge hardness approx. 64 HRC

CUTTING PLIERS

optimum cutting-edge geometry:
precise, easy cutting even if strands
are resting on a board

restricted opening
for ergonomic hand
spreading width

grooves for non-slip grip
when applying a little
pressure

78 71 125 ESD

ESD pliers (electrostatic discharge)

- electrostatic energy is discharged through the handles in a gradual and controlled manner
- which protects components endangered by electrostatic discharge
- in accordance with applicable standards, e.g. IEC TR 61 340-5, DIN EN 61 340-5, SP Method 2472

- precision pliers for ultra fine cutting work, e.g. in electronics and fine mechanics
- electrically discharging handles – dissipative
- ground, very sharp cutting edges without bevel for flush cutting
- precision shaped tips cut wires resting on a board from 0.2 mm dia.
- joint with stainless steel rivet
- extremely smooth movement for minimum operator fatigue
- with opening spring and restricted opening

78 03 125 ESD

The subtle difference

KNIPEX precision electronics pliers are made of high-quality ball bearing steel and processed with the highest degree of care. Each opening movement is gentle and even without backlash. Each work step proceeds reliably and precisely. This makes work much easier for professionals.

- precision pliers for ultra fine cutting work, e.g. in electronics and fine mechanics
- very precisely ground and sharp cutting edges with very small bevels for exact cutting on delicate electronic components; also available without bevel for flush cutting
- cutting edges additionally induction hardened, cutting edge hardness approx. 64 HRC
- approx. 20 % lighter than conventional electronics pliers
- bolted joint with particularly carefully manufactured joint surfaces for even, low-friction movement throughout the entire opening range
- smooth-running double spring for a gentle and even opening
- ergonomically optimised multi-component handles
- forged from chrome vanadium ball-bearing steel

Pliers Wrenches

(PATENTED)

pliers and wrench in a single tool

DIN ISO 5743

86 03 150

86 03 180

86 05 250

86 03 300

The smooth jaws grip all parallel surfaces in the capacity range with a high degree of pressure if necessary and open up almost unlimited application possibilities for the pliers wrench: e.g. for tightening locknuts, exerting pressure to activate the adhesive power of contact adhesives, edge breaking in tile work, snapping cable ties, utilisation as a small vice.

- adjustable tool for tightening screws
- also excellent for gripping, holding, pressing and bending workpieces
- replaces a set of spanners, metric and imperial
- smooth jaws for cautious installation of plated fittings
- zero backlash jaw pressure prevents damage to edges of sensitive components
- adjustment at the touch of a button directly on the workpiece
- parallel jaws allow infinitely variable gripping of all widths to the specified maximum size
- reliable catching of the hinge bolt: no unintentional shifting
- the action of the jaws allows quick tightening and release of bolted connections using the ratchet principle
- lever transmission greater than 10 - 1 for strong gripping power
- Chrome vanadium electric steel, forged, oil-hardened

Length 150 mm

the mini pliers wrench for precision mechanics; ideal multi-purpose wrench in pocket size; indispensable companion in emergency tool kit

Length 180 mm

with narrow gripping jaws – for tightening situations that require a slim tool

Working on plated fittings without damage of the surface

Conventional open end wrench: edge pressure causes surface damage

Pliers wrench: zero backlash contact pressure, no damage to edges

Working using the ratchet principle

Fast adjustment by pushing a button

KNIPEX Cobra® – the Hightech Water Pump Pliers. No more time-consuming presetting of the required opening size. Just position the upper jaw to the workpiece, push button and move close the lower jaw, ingeniously simple.

- adjustment at the touch of a button directly on the workpiece
- fine adjustment for optimum adaptation to different sizes of workpieces and a comfortable handle width
- self-locking on pipes and nuts: no slipping on the workpiece and low hand force required
- gripping surfaces with special hardened teeth, teeth hardness approx. 61 HRC: low wear and stable gripping
- box-joint design: high stability because of double guide
- reliable catching of the hinge bolt: no unintentional shifting
- guard prevents operators' fingers being pinched
- Chrome vanadium electric steel, forged, oil-hardened

Length 125 mm

for use in precision mechanics, hobbies and home activities; improved access in very confined areas

Length 180 mm

good access to the workpiece

Length 250 mm / 300 mm

very large gripping capacity; good access to the workpiece; high load capacity having a slim design

Teeth set against the direction of rotation have a self-locking effect and prevent slipping on the workpiece.

Fine adjustment by pushing a button: fast and comfortable

Fast and firm adjustment directly on the workpiece

Mini-Cobra:
pocket sized tool with full fledged
tool function.
Capacity up to 27 mm dia.

KNIPEX Cobra® XL/XXL (PATENTED)

Pipe Wrenches and Water Pump Pliers

DIN ISO 5743

87 01 400

Both the KNIPEX Cobra® XL and XXL offer the performance and comfort of water pump pliers while being lighter in weight and having a greater gripping capacity than comparable pipe wrenches. The **Cobra® XL** can e.g. grip a 2" pipe fitting and weighs 50 % less than a 2" pipe wrench, which has a much lower gripping capacity. With its handy length of 400 mm, the Cobra® XL also fits into a plumber's tool kit.

The **Cobra® XXL** comes along with the weight of a 2" pipe wrench but offers a back-up gripping capacity up to 4 1/2".

87 01 560

Fine adjustment by pushing a button: fast and comfortable

- greater gripping capacity but much lower weight than comparable pipe wrenches
- fast push-button adjustment directly on the workpiece, no unintentional slipping of the joint
- fine adjustment for optimum adaptation to different sizes of workpieces and a comfortable handle width
- self-locking on pipes and nuts: no slipping on the workpiece and low hand force required
- gripping surfaces with special hardened teeth, teeth hardness approx. 61 HRC: low wear and stable gripping
- box-joint design: high stability because of double guide
- guard prevents operators' fingers being pinched
- Chrome vanadium electric steel, forged, oil-hardened

Self-locking on pipes and nuts. No slipping on the workpiece and less hand force required.

Fast and firm adjustment directly on the workpiece.

KNIPEX SmartGrip® (PATENTED)

Water Pump Pliers with automatic adjustment

DIN ISO 8976

85 01 250

Automatic adjustment: no time-consuming trial and error-adjusting to find the correct opening size in case of differently sized workpieces (e.g. the red highlighted nuts and fittings). Everything done with a single grasp.

Slim dimensions for good access to the workpiece using one-hand operation

Locking lever for space saving transport with reliable closed handles

Self-locking on pipes and nuts: no slipping on the workpiece

Adjustment to suit the workpiece is automatic with the KNIPEX SmartGrip®! Place the outer jaw on the workpiece, squeeze the handles - turn!

- ideal for frequent changeovers to workpieces of different sizes
- automatic adjustment per one-hand operation both for right-handed and left-handed use
- good access to the workpiece thanks to the slim dimensions in the head and joint area and flush joint bolt
- self-locking on pipes and nuts: no slipping on the workpiece and low hand force required
- gripping surfaces with special hardened teeth, teeth hardness approx. 61 HRC: low wear and stable gripping
- box-joint design: high stability because of double guide
- guard prevents operators' fingers being pinched
- locking lever for space saving transport with reliable closed handles
- Chrome vanadium electric steel, forged, oil-hardened

KNIPEX Cobra® VDE

(PATENTED)

Hightech Water Pump Pliers, insulated

DIN ISO 8976 IEC 60900 DIN EN 60900

87 26 250

The adjustment procedure to adapt to the workpiece is easy and reliable with the KNIPEX Cobra® VDE: place the upper gripping jaw of the opened pliers on the workpiece, push pliers handle to close, done!

- adjustment by shifting one jaw directly on to the workpiece: fast, reliable and comfortable handling
- opening at the touch of a button off the workpiece
- fine adjustment for optimum adaptation to different sizes of workpieces and a comfortable handle width
- good access to the workpiece due to slim size in the head and joint area
- self-locking on pipes and nuts: no slipping on the workpiece and low hand force required
- gripping surfaces with special hardened teeth, teeth hardness approx. 61 HRC: low wear and stable gripping
- box-joint design: high stability because of double guide
- guard prevents operators' fingers being pinched
- Chrome vanadium electric steel, forged, oil-hardened

Quick setting without using a push-button

Just push the pliers handle to adjust!

Multiple Slip Joint Spanner

PATENTED

DIN ISO 5743

87 41 250

The KNIPEX Multiple Slip Joint Spanner combines the convenience of the comfortable push-button adjustment on the workpiece and the function of an all-purpose tightening tool. Jaw gripping with zero backlash prevents slipping on the bolt head or rounding edges. Even rusty or thick coated bolted connections which have no surfaces capable of being gripped reliably by a conventional spanner can be managed by the exceptionally powerful closing gripping jaws of this spanner.

- for metric and imperial nuts and screws with widths across flats from 10 to 32 mm (3/8" up to 1 1/4"); self-locking in the range from 17 mm on: no slipping on the workpiece
- zero-backlash gripping of metric or imperial hexagonal headed screws, no rounding of bolt heads
- reliable and tight gripping of rounded, rusty, or thick coated bolts and screws
- ideal for work on vehicle brake systems
- quick tightening of bolted connections using ratchet action
- adjustment at the touch of a button directly on the workpiece, also possible with one hand only
- fine adjustment for optimum adaptation to different sizes of workpieces and a comfortable handle width
- box-joint design: high stability because of double guide
- reliable catching of the hinge bolt: no unintentional shifting
- favourable lever action: optimum transmission of force
- guard prevents operators' fingers being pinched
- replaces a set of wrenches, ideal for tightening locknuts
- Chrome vanadium electric steel, forged, oil-hardened

In operation on rusted nut with rounded edges

Self-locking: no slip on workpieces; less effort required

Fine adjustment by pushing a button: fast and comfortable

KNIPEX Cobra® ES (PATENTED)

Water Pump Pliers extra-slim

DIN ISO 8976

87 51 250

Due to the increasing compactness of components and machines the workspace becomes more confined. However, the requirements on the gripping force and capacity of the tools do not decrease on the other hand. KNIPEX-“Cobra” ES allows powerful gripping in confined areas.

- ideal for service, maintenance and equipment repair, in automotive and general industry
- long, narrow jaws
- particularly good access to the workpiece due to very slim construction of head and joint area
- firm grip also on flat material due to three-point rest
- adjustment at the touch of a button directly on the workpiece
- fine adjustment for optimum adaptation to different sizes of workpieces and a comfortable handle width
- self-locking on pipes and nuts: no slipping on the workpiece and low hand force required
- box-joint design: high stability because of double guide
- reliable catching of the hinge bolt: no unintentional shifting
- favourable lever action: optimum transmission of force
- guard prevents operators' fingers being pinched
- Chrome vanadium electric steel, forged, oil-hardened

Grips nuts up to 34 mm (1 5/8") across flats

Very slim design in the complete head and joint area (compared to conventional water pump pliers)

Fine adjustment by pushing a button: fast and comfortable

Optimum access to the workpiece. Ideal for service, maintenance and equipment repair, in automotive and general industry

Article No.	EAN 4003773-	↔ mm		Pliers	Head	Handles	⊘ Inch	⊘ mm	⬡ mm	max. parallel opening width	max. gripping depth	Adjustment positions	⚖ g

88

KNIPEX Alligator® Water Pump Pliers

DIN ISO 8976

88 01 180

88 01 250

88 02 250

88 05 250

88 06 250

88 07 250

- self-locking on pipes and nuts: no slipping on the workpiece and low hand force required
- gripping surfaces with special hardened teeth, teeth hardness approx. 61 HRC: low wear and stable gripping
- box-joint design: high stability because of double guide
- robust construction, insensitive to dirt; particularly suitable for outdoor work
- guard prevents operators' fingers being pinched
- Chrome vanadium electric steel, forged, oil-hardened

Length 250 / 300 mm

more output and comfort compared to conventional water pump pliers of the same length: 9-notch adjustment positioning for 30 % more gripping capacity; good access to the workpiece due to slim size in the head and joint area

Self-locking on pipes and nuts: no slipping on the workpiece; the complete actuating force can be used to turn the workpieces; not having to squeeze the pliers handles reduces the required effort

Conventional water pump pliers

Alligator® 250/300

specially hardened teeth

high resistance to wear, allowing durable, reliable gripping

robust adjusting mechanism

insensitive to dirt, particularly suitable for outdoor work

9-notch curved adjustment positioning

30 % more gripping capacity, optimised adjustment to the workpiece and a handy handle position, slim design

box joint, double guide

no loosening of the joint connection, continuous heavy duty

Alligator®

Alligator® 250: convincing alternative

The Alligator® 250 mm grips the union nut in a 3/4" compression fitting with comfortable handle positioning

Conventional 250-mm water pump pliers do not offer appropriate fit and they have an unfavourable handle position (gripping capacity exceeded)

Alligator® 300 instead of a 1 1/2" pipe wrench

Alligator® 300 with a gripping capacity on pipes of up to 2 3/4" and width across flats of 60 mm; this corresponds to a gripping capacity of a 1 1/2" pipe wrench, which is much larger and heavier

Cable Shears with twin cutting edge

(PATENTED)

95 11 200

95 12 200

95 16 200

95 17 200

The twin cutting edge allows a comfortable handle position in all cutting situations within the specified cutting capacity.

- for cutting copper and aluminium cables
- not suitable for steel wire and hard drawn copper conductors
- precision ground, hardened blades
- clean and smooth cut without crushing and deformation
- by dividing the cutting actions into initial cut (insulating sheath in the front cutting area) and final cut (conductor in the back cutting area), cables up to Ø 20 mm can be cut in one-hand operation
- less effort required due to favourable lever ratio and optimised cutting-edge geometry
- guard prevents operators' fingers being pinched
- adjustable bolted joint, self-retaining screw
- High-grade special tool steel, forged, oil-hardened

Initial cut:
using the front cutting edge to cut the insulating sheath on larger cable diameters leaves an ergonomic handle opening width.

Final cut:
after cutting the sheath in the front profile the cut is finished through the metal part of the cable in the rear profile. Initial cut in the front profile, final cut in the rear profile – to keep it as easy as possible.

Cable Shears (ratchet action)

with telescopic handles

95 32 038

Handles adjustable in length and angular position for easier work: set the handle length to the optimum lever for powerful cutting; put the handles at an angle for a comfortable gripping position

Cable shears with adjustable telescopic handles allowing angular positioning

- for cable diameters up to 38 mm, handles can be positioned at an angle to set the optimum handle width, which makes the shear also suitable for work in confined areas
- comfortable work thanks to ratchet action and low weight
- heavy duty telescopic handles made of oval aluminium tubing; extendable up to 770 mm for maximum leverage on large cable diameters; retractable down to 570 mm for minimum space requirements during transport
- replaceable cutting head
- extensive cutting range up to max. Ø 38 mm or max. 280 mm² (e.g. 4 x 70 mm² NYY) in copper and aluminium cables
- easier, neater cut due to optimised cutting-edge geometry
- adjustable bolted joint
- Cutting head: special quality high-grade tool steel, oil-hardened
- Handles: high-strength oval aluminium tubing

Setting of a favourable handle width

After the first partial cut, the handles open by ratchet action

Repeat cutting and opening actions until the cable is cut through

with adjusting button

Bowden Cable Cutter

95 61 150

 MM

- for Bowden cables and soft wire rope up to 3.0 mm dia. (also V2A)
- smooth and clean cutting due to special shape of the cutting edges
- sickle shape cutting edges surround the material and prevent the wire rope fanning out
- little handforce required due to very high transmission ratio
- with opening spring and locking device
- cutting edges additionally induction hardened

- High-grade special tool steel, forged, oil-hardened

95

Wire Rope and ACSR-Cable Cutters

95 71 600

- for wire ropes and steel rods, copper and aluminium cables
- suitable for cutting overhead cables with strain relief wire (ACSR-cables)
- angular cutting blades allow cutting of single rope wire
- optimum transmission ratio for high cutting performance
- bolted cutter head, replaceable
- low weight
- Cutter head: high-grade special tool steel, oil-hardened
- Handles: aluminium, high-strength

95 77 600

 1000 V

95 81 600
 with reinforced cutter head for higher performance, also cuts piano wire

KNIPEX MultiCrimp®

Crimping Pliers with quick changer magazine

97 33 01

97 33 02

97 33 01

Crimping pliers with round magazine and three interchangeable die sets for non-insulated open plug connectors (4.8 + 6.3 mm width) from 0.5 - 6.0 mm²; insulated terminals + plug connectors from 0.5 - 6.0 mm²; end sleeves (ferrules) from 0.25 - 6.0 mm²

97 33 02

Crimping pliers with round magazine and five interchangeable die sets for non-insulated open plug connectors (4.8 + 6.3 mm width) from 0.5 - 6.0 mm²; insulated terminals + plug connectors from 0.5 - 6.0 mm²; end sleeves (ferrules) from 0.25 - 6.0 mm²; non-insulated terminals and plug connectors from 0.5 - 10 mm²; non-insulated butt connectors from 1.5 - 10 mm²

The MultiCrimp® Pliers are not available in the U.S.A.

Compact, inexpensive and light-weight crimping pliers for fitting and repairs. The electrician needs only one tool now instead of five as before.

- just one tool for the most common crimping applications
- crimping dies changed quickly and easily without any additional tool
- secure and protected storage of the interchangeable dies in a round magazine
- comfortable, powerful crimping pliers in professional quality
- same reliable crimping results as with fixed crimping dies
- repetitive, high crimping quality due to precision dies and integral lock (self-releasing mechanism)
- Chrome vanadium electric steel in special quality, oil-hardened
- Round magazine: plastic, fibreglass-reinforced

Changing position: service lever opens out for parallel jaw positioning

Changing the crimping dies: unlock the magazine position, take out the set of dies which the pliers have been pushed on

Fold in the service lever and press the pliers – ready for use again

Magazine for crimping dies can be carried on a belt

Clearly visible marking on the crimping dies with pictograms

The MultiCrimp® Pliers are not available in the U.S.A.

Crimp System Pliers

for exchangeable crimping dies

PATENTED

With the possibility of crimping almost all currently available crimping connections with just one tool and state-of-the-art crimping pliers technology, the crimping system pliers solves almost all tasks in mobile and stationary crimping technology and is an excellent tool for professionals to use for standard crimping.

97 43 200
MM

97 43 200 A
MM

- just one tool for almost 1000 crimping applications
- almost parallel crimping die movement
- repetitive, high crimping quality due to precision dies and integral lock (self-releasing mechanism)
- crimping pressure has been set precisely (calibrated) in the factory, re-adjustable
- optimum transmission of force due to lever action for fatigue-reduced operation
- ergonomically designed handles
- different locators for precise positioning of the connectors
- crimping dies for applications not covered in the range offered here, may be available on request
- Chrome vanadium electric steel in special quality, oil-hardened

97 43 200

comes in a plastic case; foam insert with recesses for crimping dies and locators; with service tool (Allen key), screws and nuts; without crimping dies

97 43 200 A

Pliers without crimping dies, without case

97 43 05

with attached crimping dies for non-insulated open plug-type connectors (4.8 and 6.3 mm connector width)

97 43 06

with attached crimping dies for insulated terminals and plug connectors

Crimp System Pliers 97 43 200 with crimping dies 94 49 30 for non-insulated butt connectors

Crimp System Pliers 97 43 200 with crimping dies 97 49 35 for spark plug connectors

97 43 200 with crimping dies 97 49 61 and revolvable locator 97 49 90 for turned types of connectors with varying pin diameters

97 43 400 Crimp System Pliers with crimping dies 97 49 24 and locator 97 49 93 for D-Sub plugs

- exact crimping process due to parallel crimping
- repetitive, high crimping quality due to integral lock (self-releasing mechanism)
- optimum transmission of force due to toggle lever action for fatigue-reduced operation
- with length cutter and dismantling knife for ribbon cables 6 and 12 mm length
- with additional stripping device for round cables
- Chrome vanadium electric steel in special quality, oil-hardened

First step: move the handle with two fingers only until both jaws touch the connector to be crimped

Second step: now use the whole hand for further crimping procedure

Third step: when greater hand force is required, such as e.g. when crimping insulated connectors 6.0 mm², two-hand operation is possible by the longer handles

- for solder-free electrical connections
- the ingenious lever transmission reduces the handforce up to 30 % compared with regular crimping pliers
- repetitive, high crimping quality due to precision dies and integral lock (self-releasing mechanism)
- crimping pressure has been set precisely (calibrated) in the factory, re-adjustable
- two-hand operation for easy crimping of large conductor diameters
- easy handling as a result of well balanced centre of gravity, angled head and ergonomically shaped handles
- Chrome vanadium electric steel in special quality, oil-hardened

KNIPEX PreciForce® Crimping Pliers

For daily crimping applications, the specialist likes crimping pliers that work precisely and reliably. In addition, they should be light, comfortable to use, robust and reasonably priced: PreciForce®.

- repetitive, high crimping quality due to precision dies and integral lock (self-releasing mechanism)
- crimping pressure has been set precisely (calibrated) in the factory, re-adjustable
- high transmission of force thanks to toggle lever action for fatigue-reduced working
- good handling thanks to favourable handle position, low weight, compact design and ergonomically shaped handles
- Chrome vanadium electric steel in special quality, oil-hardened

Four-Mandrel Crimping Pliers for turned contacts

97 52 63 DG

(PATENTED) 

97 52 64

97 52 65

(PATENTED) 

97 52 65 DG

(PATENTED) 

97 59 65 2

Turned contacts are used for particularly demanding plug-type connections, e.g. in medical industry and aeronautics. Extremely reliable crimping connections can be achieved only with pliers that work with absolute precision and maintain the required crimping depth in the 1/100 mm range.

- for crimping turned contacts
- four-mandrel crimping for top-quality crimping connections
- mandrel gauge to check the basic setting
- repetitive, high crimping quality due to integral lock (self-releasing mechanism)
- optimum transmission of force due to highly effective lever action for fatigue-reduced operation
- high operation comfort thanks to handy shape
- Chrome vanadium electric steel in special quality, oil-hardened

97 52 63

fine adjustment of pressure depending on the conductor's diameter by means of adjusting wheel; pliers in the plastic case with foam insert and standard locator for precise positioning of the contacts

97 52 63 DG

Self-Adjusting Crimping Pliers for end sleeves (ferrules) with lateral access

PATENTED

97 53 04

97 53 14

Compact crimping pliers for end sleeves (ferrules) with two great advantages for the user:

- Automatic self-adjustment to the end sleeve (ferrule) used: this allows the specialist to work with less strain and enables secure, reliable and quick crimping.
- Extensive range of applications: square crimping 0.08 to 10.0 mm², hexagon crimping 0.08 to 6.0 mm²

- for crimping end sleeves (ferrules) according to DIN 46228 parts 1 + 4
- self-adjusting adaptation to the desired end sleeve (ferrule) size: no wrong crimps caused by using the wrong die
- fits all twin ferrules within the application range
- lateral access of the end sleeves (ferrules) into the tool
- repetitive, high crimping quality due to integral lock (self-releasing mechanism)
- these tools have been set precisely (calibrated) in the factory, re-adjustable
- optimum transmission of force due to toggle lever action for fatigue-reduced operation
- high operation comfort thanks to handy shape and low weight
- Chrome vanadium electric steel in special quality, oil-hardened

97 53 04

square crimping for optimum contact areas in the clamp connection

97 53 14

hexagonal crimping for optimum positioning in confined areas

The square crimping allows better contact. The hexagonal crimping comes very close to the space-saving round shape. Compared with the square crimp, it has the same cross-section and can make optimum contact in narrow round terminal connectors. With both crimping shapes the often tricky feeding into the terminal connection is no longer necessary.

Square-crimped end sleeves (ferrules) always ensure good contact surfaces in the clamped connection

Self-Adjusting Crimping Pliers for end sleeves (ferrules) with front loading

PATENTED

97 53 08

97 53 09

The crimping pliers for end sleeves (ferrules) with three great advantages for the user:

- Automatic self-adjustment to the end sleeve (ferrule) used: This allows the specialist to work with less strain and enables secure, reliable and quick crimping.
- Range of applications also for large cross-sections: square crimping 0.08 to 10.0 + 16.0 mm²
- Front loading: very helpful under difficult working conditions in confined spaces.

- for crimping end sleeves (ferrules) according to DIN 46228 parts 1 + 4
- self-adjusting adaptation to the desired end sleeve (ferrule) size: no wrong crimps caused by using the wrong die
- fits all twin-ferrules within the application range
- front loading of the end sleeves (ferrules) into the tool
- repetitive, high crimping quality due to integral lock (self-releasing mechanism)
- crimping pressure has been set precisely (calibrated) in the factory, re-adjustable
- optimum transmission of force due to toggle lever action for fatigue-reduced operation
- high operation comfort thanks to handy shape and low weight
- Chrome vanadium electric steel in special quality, oil-hardened

97 53 08

crimping from 0.08 - 10.0 mm² in one profile; end sleeves (ferrules) up to 2.5 mm² can also be loaded parallelly from the side

97 53 09

crimping from 0.08 - 10.0 and 16.0 mm² in one profile; with selector lever for setting the crimping area either to 0.08 - 10 mm² or 16 mm²

Square crimping

Front loading of end sleeves (ferrules) e.g. in switchboards

97 53 08: lateral loading of end sleeves (ferrules) up to 2.5 mm² parallelly from the side e.g. in confined areas

Tool Case for Photovoltaics

97 91 01

- with tools for photovoltaics
- without crimping dies – for individual equipment – please order separately (see ref. 97 49 ...)
- with service tools (hexagonal key) for the change of crimping dies
- shock-resistant plastic case
- foam insert with recesses for tools, crimping dies and locators
- external dimensions (W x H x D): 345 x 80 x 280 mm

VDE PLIERS HANDLES: IMPROVED COMFORT DESIGN.

distinctive VDE design

rounded collar edges reduce uncomfortable pressure points

recess in the collar to facilitate a precise and steady pliers guidance

durable injection-moulded marking

optimised arrangement of the soft and hard components

yellow, softer material for a better grip when force is applied

red, harder material reduces friction when the grips need to slide in the hand

INSULATED TOOLS

Work on electrical installations is subject to the special protection tasks of authorities and insurance companies. This resulted in the creation of diverse national and international safety standards (e.g. in Germany the VDE 0105 and BGR A3, internationally EN 50110 or IEC 60364). Only a qualified electrician who respects and follows these regulations is permitted to carry out work on electrical installations (including live working). He has to use special tools for this particular work that have been specifically made for this kind of work and have been thoroughly tested.

KNIPEX insulated tools are made of high-quality materials, which have been manufactured and tested in conformance with the regulations of national and international standards. If the prescribed method for working on electrical installations (see above), are observed, these tools offer the greatest possible protection even when it is necessary to work live up to AC 1000 V (alternating current) and DC 1500 V (direct current).

Since 1987 the IEC 60900 has specified worldwide requirements for tools for live working, while DIN EN 60900 made these mandatory for the EU countries as from 1995. Tests on KNIPEX tools which bear the special mark **1000V** include subjecting them to routine tests with 10,000 volts to check their dielectric strength. This gives the user a considerable buffer of additional protection even if work on electrical installations needs to be performed live.

The mark **1000V** identifies KNIPEX insulated tools as being suitable for live working. The specified standard also shows the requirements our claim can be measured against. The manufacturer name KNIPEX on the insulation indicates that we accept responsibility for the correctness of this information. The **GS** marks prove: The observation of these requirements is monitored not only by the KNIPEX quality assurance team but also e.g. by VDE (Association of German Electricians).

Because the purchase of insulated hand tools is a matter of trust.

Type examination, manufacturing inspections and stock monitoring by the neutral VDE testing centre.

COVER INSULATION (VERSION 6)

KNIPEX pliers with the two-colour multi-component handle cover insulation meet the requirements of VDE 0682 Part 201 and corresponding international standards (e.g. EN 60900 or IEC 60900). This claim is confirmed by the VDE/GS mark awarded by an obligatorily neutral inspection body.

The slip guard is designed so that the hand cannot slip unintentionally on conductive metal parts on the head of the pliers.

DIPPED INSULATION (VERSION 7)

Other hand tools such as open ended spanners/ single ended box wrenches, socket wrenches, ratchets etc. are insulated at KNIPEX using a plastic dipping method. These also meet all requirements of the VDE standard and corresponding international standards (such as IEC 60900 or DIN EN 60900). To round off this range, KNIPEX also insulates pliers in a dipping process to adapt these tools concerning appearance and production method to the other dipped insulated tools. These pliers also bear the VDE/GS mark.

The firmly bonded double dipped insulation is made of insulating material which is free of harmful substances and more than 1 mm thick at each point.

Extra thick insulation at the ends of the handles. This prevents cracks following an impact.

Always comply with the currently valid regulations and observe the SAFETY INSTRUCTIONS given below:

- Insulated tools must be transported in a manner that will prevent any damage to the insulation.
- Check before every use whether the insulation is damaged in any way, defective tools must be discarded.
- Always keep your insulated tools clean and dry.
- Wear protective goggles when working with cutting nippers or working overhead.
- Always wear goggles or a facial mask when working on live equipment.
- Make sure the workplace is clean and orderly, particularly when you are working on live installations.
- Wear protective clothing and use SAFETY equipment (e.g. insulating gloves, insulating mats, protective covers) especially in confined working spaces.
- Use only a tool with suitable dimensions. That will prevent slipping on the workpiece and unintentional contact with non-insulated parts.
- Make sure that detached parts or cut-off ends of conductors do not fall onto live parts.

KNIPEX INSULATED TOOLS – 100 % TESTED, ONE BY ONE

Testing dielectric strength

Each KNIPEX **1000 V** insulated tool has been tested individually. This individual testing is done with a test voltage of AC 10,000 volts. This test load, which is 10 times as high as the maximum permitted voltage during work, inspires the user to trust a reliable insulation when live working.

Testing the adhesion of the insulating coating

The adhesion of the insulation coating is tested after storage of 168 hours at 70°C. In case of pliers a tensile load of 500 N is applied. The insulating material must remain firmly bonded to the basic tool.

Testing low temperature impact strength

The tools are cooled down to -25°C. The insulation material must retain the toughness necessary to ensure that it does not break when hit or knocked.

Testing burning behaviour

KNIPEX uses only flame-resistant and self-extinguishing plastics for insulation.

Testing electrical insulation

After submersion in water for 24 hours, the tools are tested with AC 10,000 V for 3 minutes including measuring of the leakage current. The reading of the leakage current must stay below the limits defined in the standards.

Testing indentation resistance

The insulation heated to 70°C must prove under standardised test conditions that the warm plastic has sufficient mechanical strength to resist expected loads.

Pliers Wrench insulated

IEC 60900 DIN EN 60900

PATENTED

86 07 250

1000 V

- pliers and wrench in a single tool
- also excellent for gripping, holding, pressing and bending workpieces
- zero backlash jaw pressure prevents damage to edges of sensitive and soft nuts (Cu)
- with scale for presetting the opening width apart from the workpiece
- no unintentional shift of the gripping jaws and no slipping of the joint
- parallel jaws allow infinitely variable gripping of all widths to the specified maximum size
- the action of the jaws allows quick tightening and release of bolted connections using the ratchet principle
- lever transmission greater than 10 – 1 for strong gripping power
- Chrome vanadium electric steel, forged, oil-hardened

Scale for setting the opening width, apart from the workpiece

KNIPEX Cobra® VDE

Hightech Water Pump Pliers, insulated

DIN ISO 8976 IEC 60900 DIN EN 60900

PATENTED

87 26 250

1000V VDE GS

Quick setting without using a push-button

Just push the pliers handle to adjust!

The adjustment procedure to adapt to the workpiece is easy and reliable with the KNIPEX Cobra® VDE: place the upper gripping jaw of the opened pliers on the workpiece, push pliers handle to close, done!

- adjustment by shifting one jaw directly on to the workpiece: fast, reliable and comfortable handling
- opening at the touch of a button off the workpiece
- fine adjustment to fit very different workpiece sizes with a comfortable handle position
- good access to the workpiece due to slim size in the head and joint area
- self-locking on pipes and nuts: no slipping on the workpiece and low hand force required
- gripping surfaces with special hardened teeth, teeth hardness approx. 61 HRC: low wear and reliable gripping
- box-joint design: high stability because of double guide
- guard prevents operators' fingers being pinched
- Chrome vanadium electric steel, forged, oil-hardened

Cable Shears with twin cutting edge

IEC 60900 DIN EN 60900

PATENTED

95 16 200

⚡ 1000 V    

95 17 200

⚡ 1000 V    

- for cutting copper and aluminium cables
- not suitable for steel wire and hard drawn copper conductors
- precision ground, hardened blades
- clean and smooth cut without crushing and deformation
- easy cutting with one-hand operation
- initial and final cut (upper and lower blade) allows cables of up to 20 mm dia. to be cut
- low hand force required due to favourable lever ratio and new blade geometry
- guard prevents operators' fingers being pinched
- adjustable bolted joint, self-retaining screw
- High-grade special tool steel, forged, oil-hardened

Initial cut: using the front cutting edge to cut the insulating sheath on larger cable diameters leaves an ergonomic handle opening width.

Final cut: after cutting the sheath in the front profile the cut is finished through the metal part of the cable in the rear profile. Initial cut in the front profile, final cut in the rear profile - to keep it as easy as possible.

00 21 40 T

98 99 14

- hard-wearing case made of ABS material, red; containing a range of KNIPEX tools for works on electrical installations, tested according to DIN EN/IEC 60900, as well as insulating mats, clamps and gloves for added protection
- sturdy aluminium frame with D-shape rings for belt and fix, sturdy centre board with multi-purpose push-in facilities by elastic loops and 12 small pockets
- comfortable handle and mounting device for a "Trolley" embedded in the bottom (available ordering ref. 00 21 40 T)
- metal hinges
- 30 kg maximum load
- can be opened on one or both sides; bottom tray and cover can be opened independently
- stands stable in any opening position due to lid-holders and hinge mechanisms on both sides, that register in a position of 45° and 90°
- 3-digit lock and two flip-locks for fixation of the cover
- removable document compartment and removable tool board, with 13 push-in compartments on one side
- two flip-locks to fix the bottom
- base tray, height 58 mm, can be subdivided by flexible inserts; cover plate with six large push-in compartments, can be fixed by popper
- dimensions, external (W x H x D): 490 x 255 x 410 mm
- dimensions, internal (W x H x D) : 445 x (105 + 105) x 350 mm

00 21 40 T

- telescopic handle for rolling transport of tool case
- applicable for cases: 00 21 40 LE Tool Case "BIG Twin", 98 99 14 Universal Tool Case
- height adjustable handle with catch
- integrated mechanism for fixation to the case, for rapid assembly and removal
- with two smooth running rolls
- dimensions: 60 x 245 x 400 (1.000) mm (extended)

Pen-Style Control Cabinet Key

with voltage detector

for all standard cabinets and shut-off systems

00 11 17

- easy to carry pen-style control cabinet key with fastening clip
- contactless detection of alternating current with optical indication; range of voltage 50 - 600 V; frequency range 50 - 60 Hz
- on / off button
- indicated by means of a bright LED: start-up self test, battery control and live conductor close-by detection
- battery case with bayonet catch
- four different key profiles can be utilized by swivelling the key holder
- for control cabinets and shut-off systems in the supply of gas, water and electricity
- for technical installations in buildings, e.g. air conditioning and ventilation systems, shut-off valves, mains switchboards, etc.
- universal 1/4" bit adapter for standard bits (permanent magnet for retaining)
- additional bit adapter for 1/4" bits inside one key profile
- with inset bit: cross recess PH 2
- Tool body: plastic, fibreglass-reinforced
- Key profiles: zinc die-casted
